soh jing ting

I am an adaptable and energetic designer, specialized in Interior & Spatial Design.

During my internship, I've met clients, meeting their requirements with realistic and outstanding concepts. Throughout my 3 years studies at Nanyang Polytechnic, School Of Design, the greatest assets I've acquired were having good time management, communications between group members and being committed. These assets developed me to become a person that's capable of working under pressure such as tight deadline time frames as well as making constants amendments.
